Layout

- 1. Logo Button
When clicked takes user back to home / landing page.
- 2. Navigation Menu
Takes user to various pages of the site.
Made up of 'Home', 'Projects', 'About' and 'Rec'.
- 2a. Page User is currently on
Nav category is highlighted to indicate this is the page of the site the user is currently on.
- 3. Photo
Content TBD

Layout

On default the page jumps / scrolls down to the most recent year (i.e. 2017). However the previous years / content are visible just below the locked top of the Time Line Area

1. “Year Time Line” Button

Clicking on one of these years (for example 2011) will take the user to 2011 in the timeline. The timeline will 'jump' down to the relevant area. The 'active' year (i.e. the year in the hot area of the content page) is bold to indicate this is where the user is in the timeline.

2. Project Dots

These dots show how many projects can be found in that year. For example if there are only 4 projects then only 4 dots are shown under the “Year Time Line” button. With a maximum of 8 dots.

3. Time Line area Locked to top of screen

This area stays locked to the top of the page.
All content flows under the Time Line area.

4. Project Header

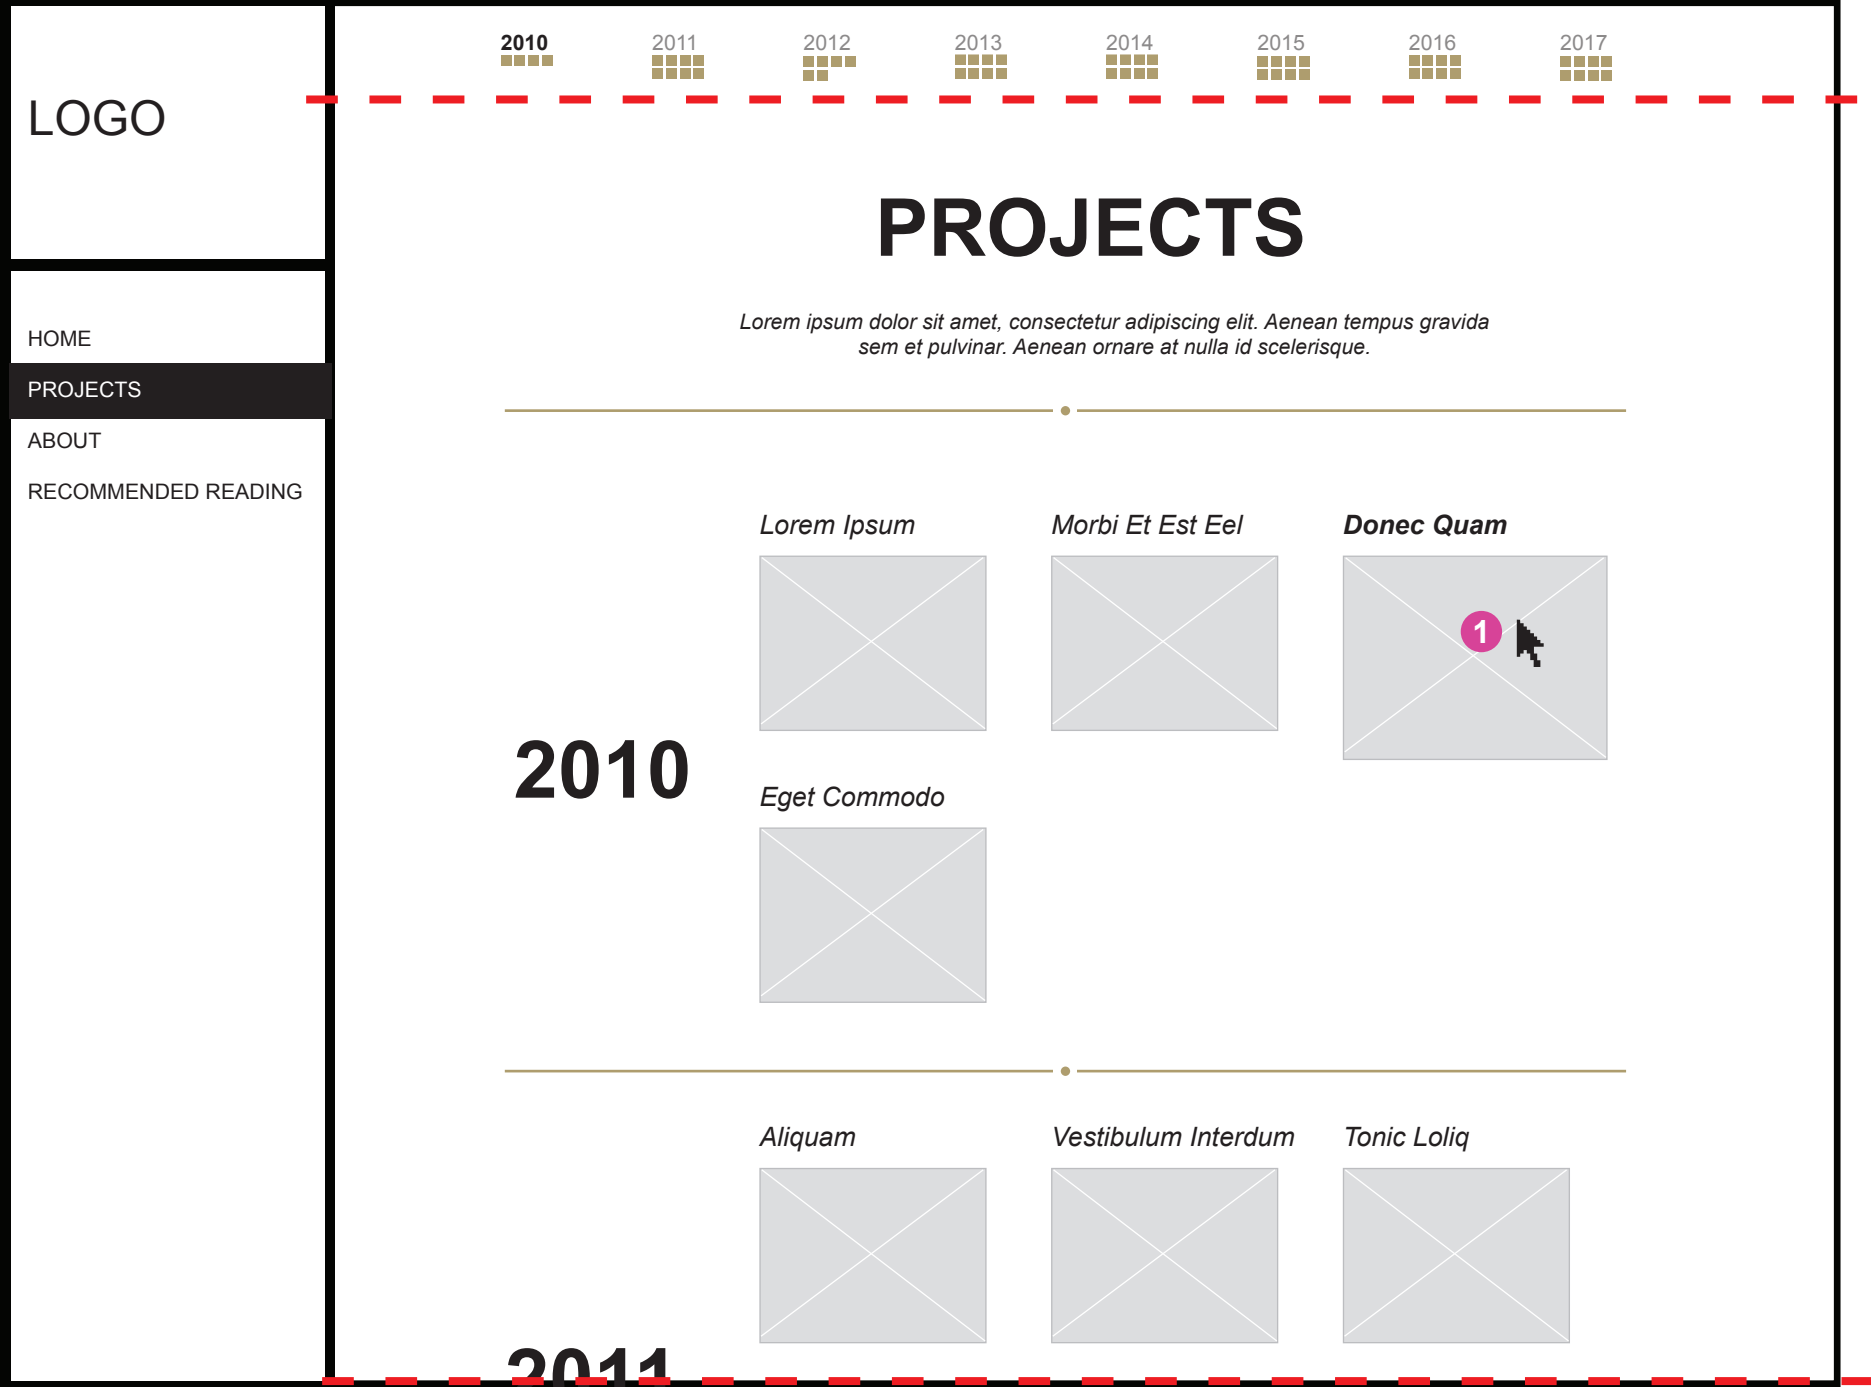

5. Descriptive Content

TBD

6. Project Year

7. Project Module

Comprised of the project's title and an image

Layout

1. Project Module On Hover
- When the user hovers over the module the image and text expands to indicate an active state. Upon clicking on the module the user is taken to a new page for that specific project.

Sites

Layout

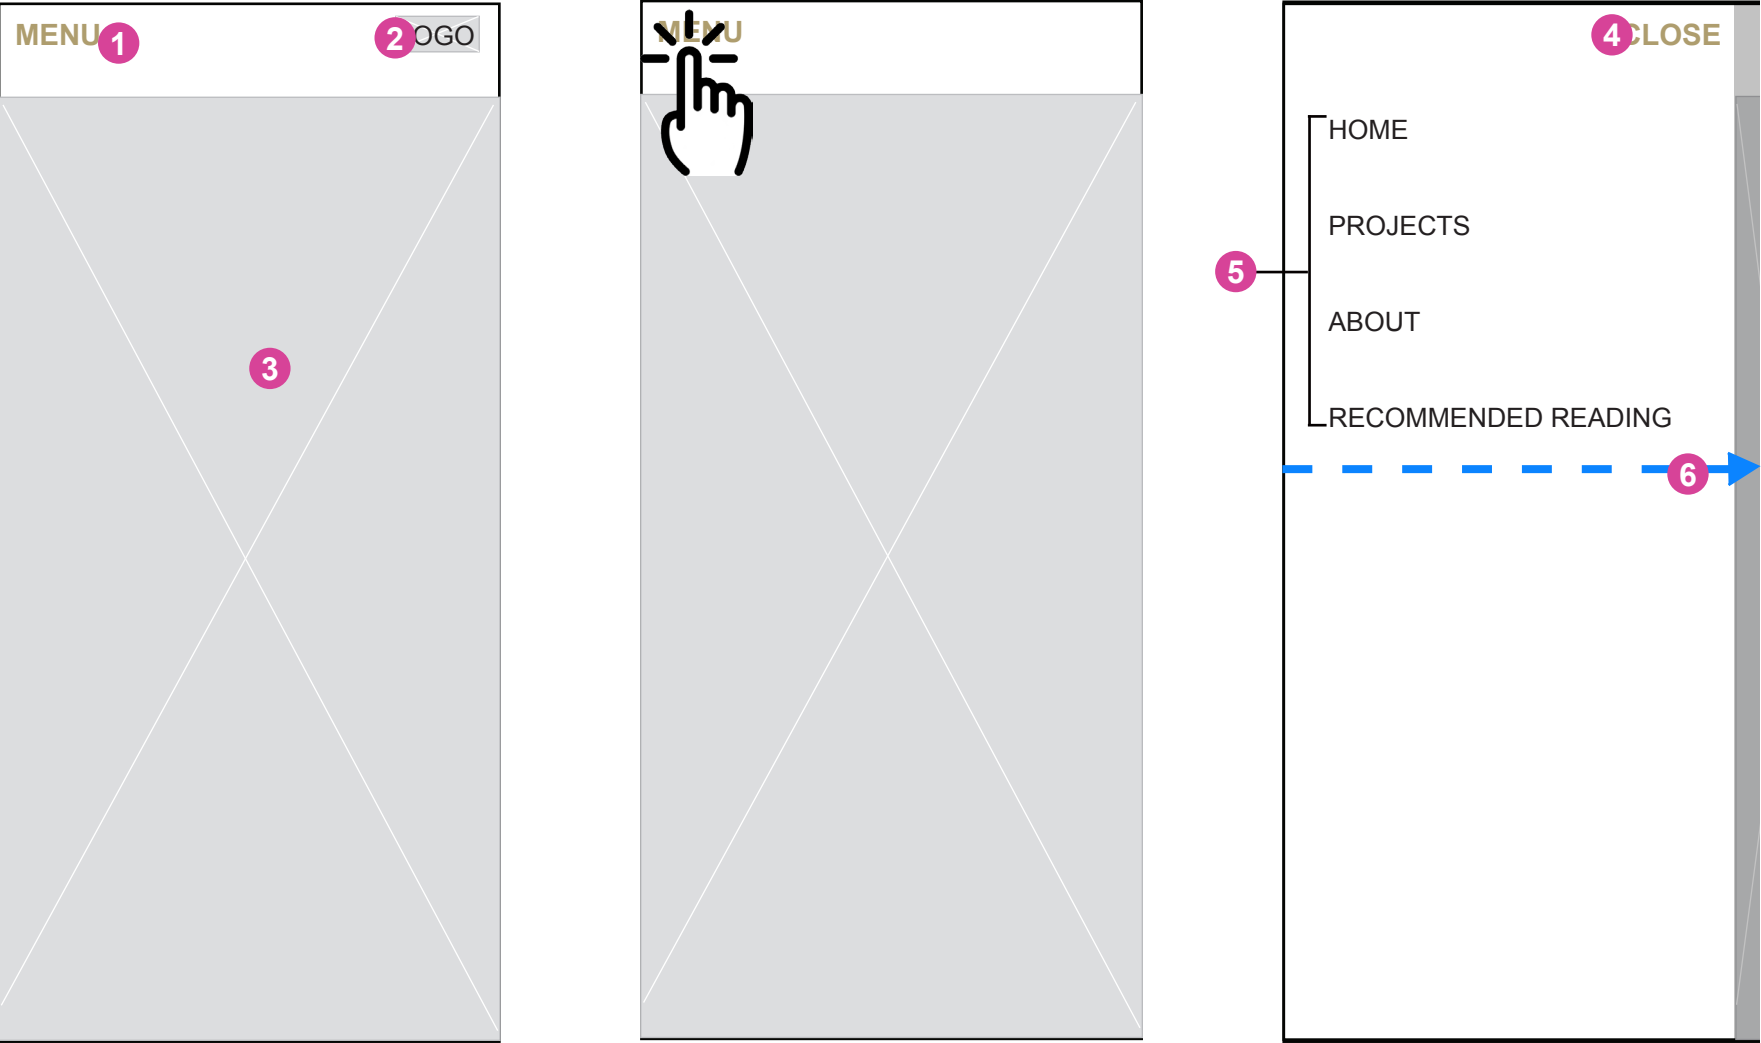

1. Header and Descriptive Content

2. Module

Has exactly the same functionality as the modules on the 'Project' page. Comprised of title and an image that when hovered on expands. However, when tapped on a new tab is opened and takes the user to wherever the module is directed. For example to an 'influencers' twitter feed.

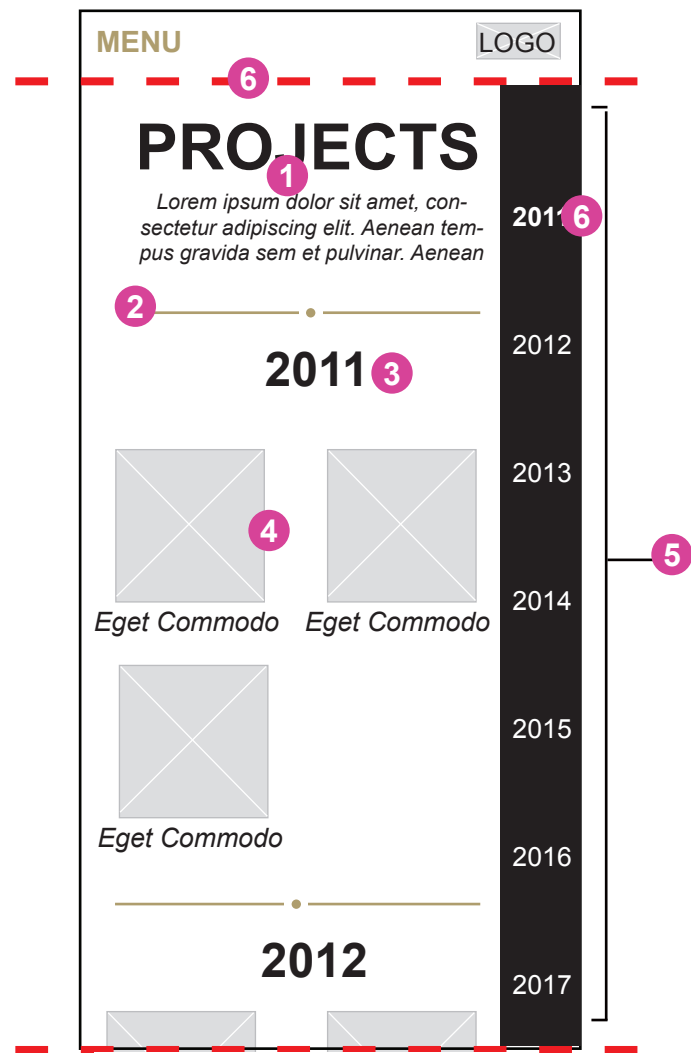

3. Section Title

Mobile Wires

Layout

- 1. Menu Button**
When tapped, a new screen slides in from the left toward the right and cover the home page. Regardless of where the user is in the experience the menu button will always open like this.
- 2. Logo Button**
When tapped will always take the user back to the homepage regardless of where theyh are in the experience.
- 3. Hero Image**
Functionality TBD but currently it does nothing.
- 4. Close Button**
When tapped closes the menu. The menu will slide left.
- 5. Menu Categories**
When tapped loads a new page. For example, if a user taps "About" then they will be taken to the About Page.
- 6. Tray functionality**
Tray containing the menu slides out right when opened. When closed, the tray slide back left.

Layout

1. Header and Descriptive Content

Shows the title of the page (here it's "Projects") and a brief description.

2. Line

Breaks up space in between projects.

3. Year of Project

Shows what year the projects happened.

4. Project Module

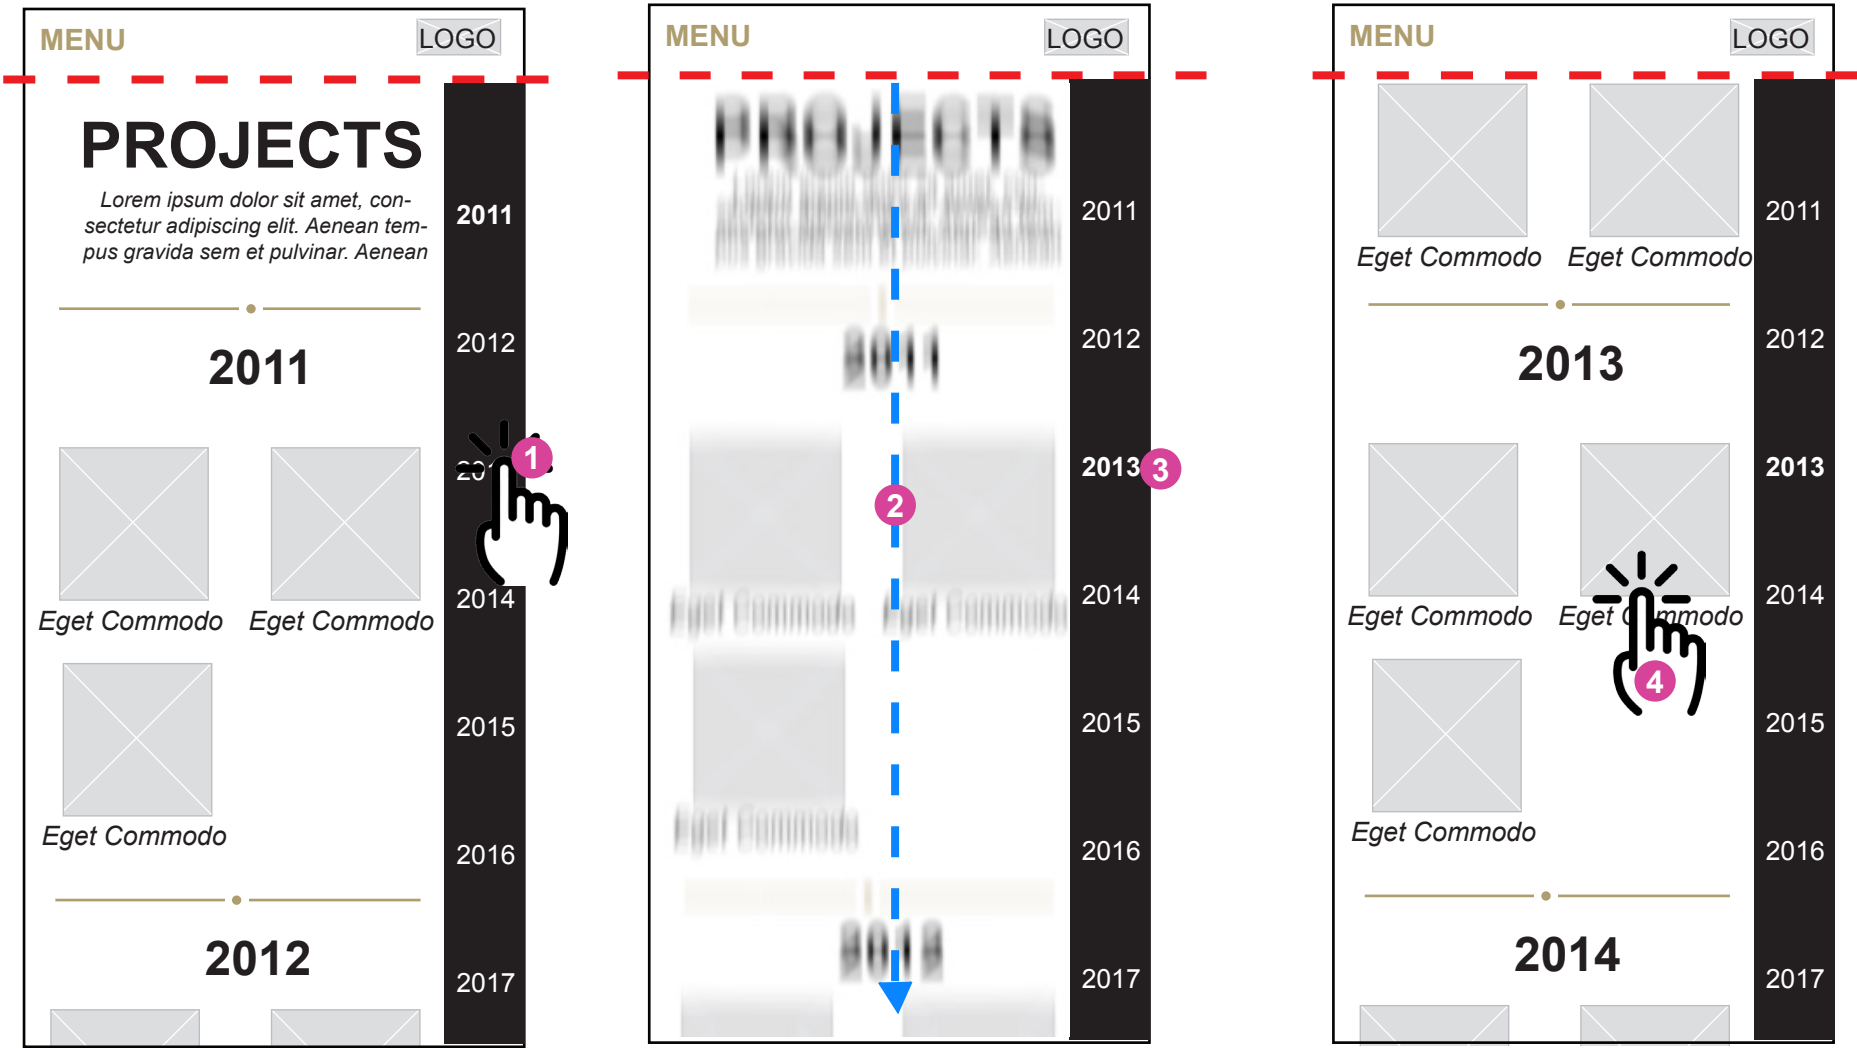

Comprised of title and an image that when tapped a new tab is opened and takes the user to wherever the module is directed.

5. Time Line

Shows all the years a project was created. Sticks to the side of the page. Year in the 'hot area' / center is shown bold on the timeline

6 . Active / hot area project year

Is bold to show this is where in the timeline the user currently is.

Layout

- 1. User taps on the headline
- 2. Page automatically scrolls
The projects page can scroll up or down depeneding on what year the user clicks on. Image should be blurred to indicate natural movement..
- 3. Project Year user selected is bold
- 4. Project Module
Comprised of title and an image that when tapped a new tab is opened and takes the user to that particular projects landing page.

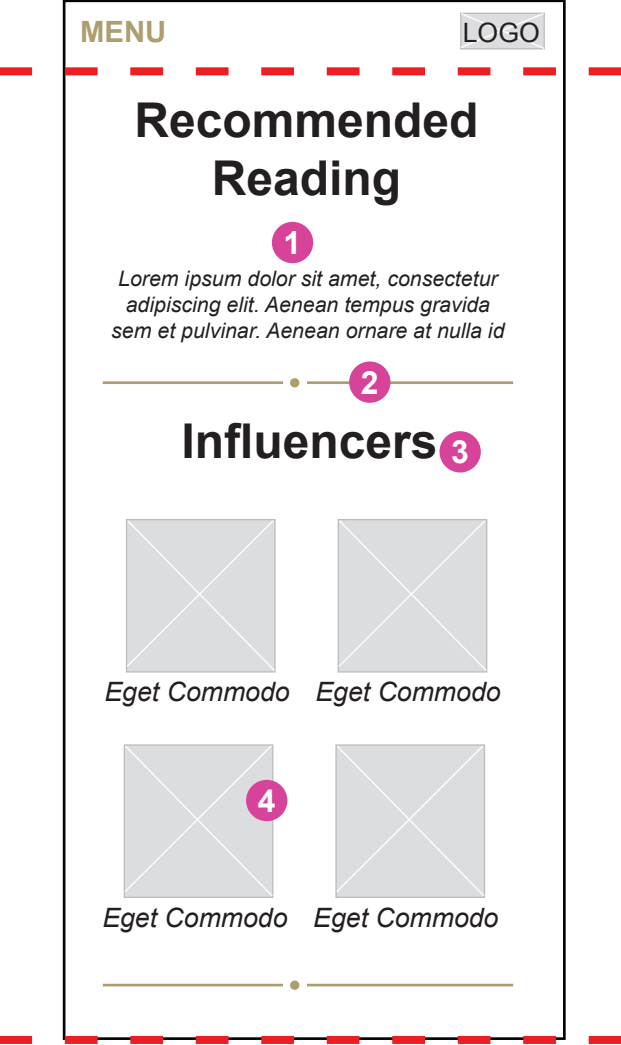

Layout

- 1. Hero Image
- 2. Active Image
 - Is highlighted to indicate this is the image that appears in the Hero area. Should default to the first one in the gallery space
- 3. Nonactive image in gallery space
 - Thumbnail shows what the image looks like. Tapping on it will make the image active (this with a boarder and appearing in the Hero Area).
- 4. Project Header & Descriptive Copy
 - Comprised of Project name / header and descriptive copy.

Layout

- 1. Hero Image
- 2. Project Header & Descriptive Copy
Comprised of Project name / header and descriptive copy.
- 3. Links
Within the text there will be words that are active links. They should be colored ae9d6e. Tapping on a link will open a new tab and the user can explore the new page.

Layout

1. Header and Descriptive Content

Shows the title of the page (here it's "Recommended Reading") and a brief description.

2. Line

Breaks up space in between projects.

3. Title of Area

Shows what kind of information can be found in this section.

4. Project Module

Comprised of title and an image that when tapped a new tab is opened and takes the user to wherever the module is directed.
